DREAM
BEDROOM FURNITURE

The DREAM product range 2027 is valid from 01 October 2026.
At that time, all previous sales documents will become invalid.
This Sales Manual does not contain prices. Instead, the shown points can be added up without any additional conversion.
Retailers use a conversion factor for pricing. These figures do not include installation costs.

All rights to technical alterations, delivery options, errors and printing-related colour deviations are reserved. All furnishing examples are non-binding.

DREAM
BEDROOM FURNITURE

Furnish holistically, feel good all round.
A home is well balanced when all rooms work together harmoniously. What started with kitchen, bathroom and living is now continuing: The bedroom is now also becoming part of the well thought out living concept. This creates a living experience that impresses from one room to the next – with individual planning, perfect coordination and consistency in every detail. In addition to a large selection of wardrobes, you also have a range of chests of drawers, bedside tables and matching accessories to choose from – for a bedroom with perfect furnishings all round.

BEDROOM RANGE
BASIC SYSTEM

Your step-by-step instructions for the perfect bedroom. The new Dream range features an impressively clear and well-arranged basic structure – wardrobes, occasional furniture and accessories can be easily and individually arranged to create a fully coordinated overall concept.

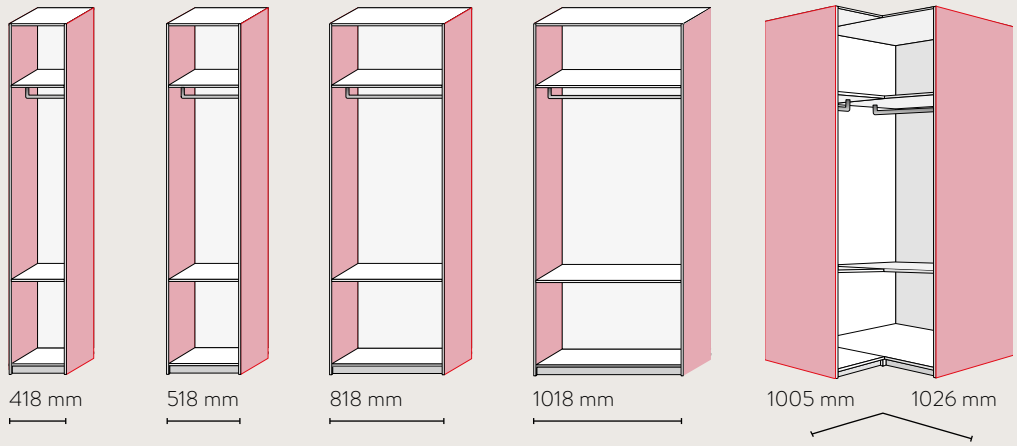

1 CARCASE SELECTION

Basic and extension elements in two heights and four widths are available as basis for your wardrobe. The basic elements can be extended with any number of extension elements. You can use this to design your wardrobe in continuous style.

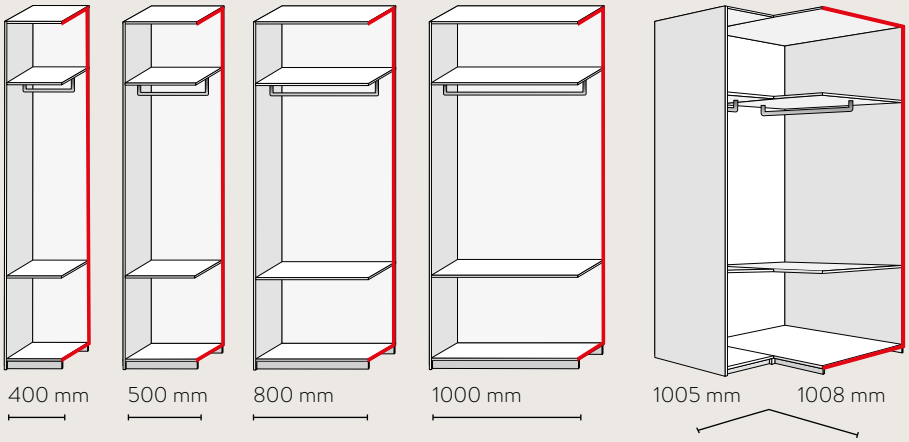

1a Select the height

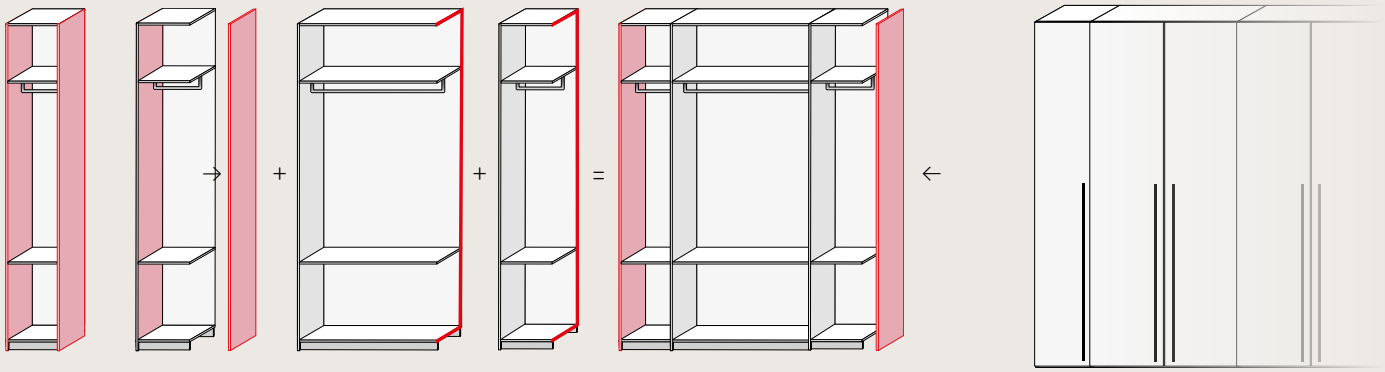

1b Select the width of the basic element

1c Select the extension elements in the desired width

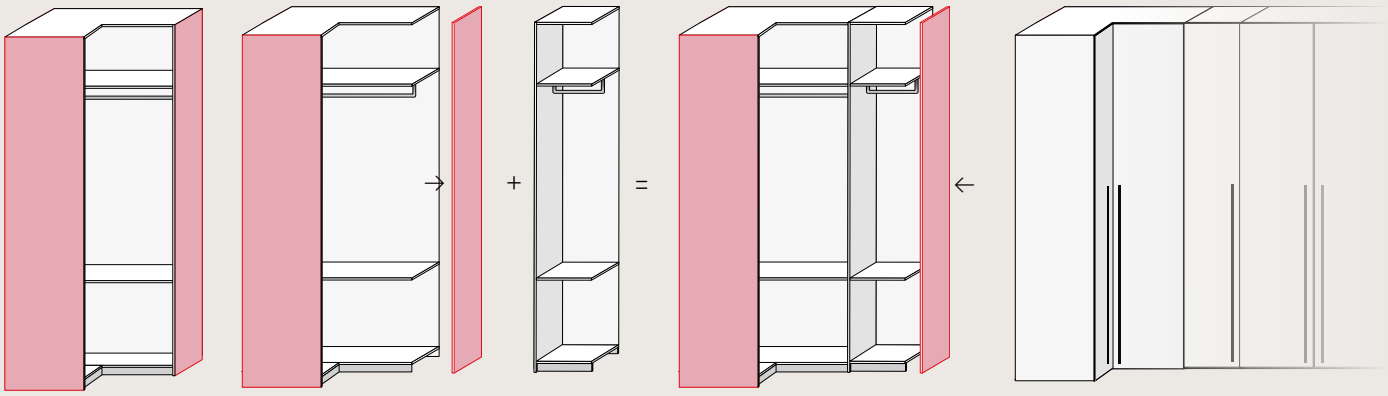

Combination plan for basic and extension elements

The second exterior side of the basic elements at the end of the plan acts as the end piece at the extension element

Continuous planning →

Combination plan for basic and extension elements for corner solutions

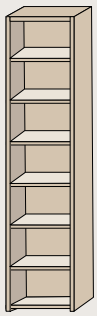

The second exterior side of the basic corner elements at the end of the plan acts as the end piece at the extension element. If the plan is continued across additional corners, corner extension elements can be used according to the same system. If the plan does not start with a basic corner element but with a basic element, a corner extension element can also be used for creating the corner. However, we recommend starting with a basic corner element for corner plans.

Continuous planning →

1d Integrating design elements

Wardrobe shelf unit

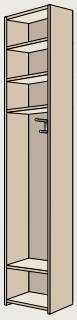

Open-shelf wardrobe units can be inserted as intermediate shelf units between two wardrobe elements or between a wardrobe element and a wall. A free-standing plan is not possible.

Shelf unit depth: 350 mm

Available décor:
362 Como oak reproduction

When planning a shelf unit, an additional basic element must be included in the plan.

Wardrobe open shelf end unit

Wardrobe open-shelf end units act as a side end piece at a wardrobe element and can be used both on the right and on the left. A free-standing plan is not possible.

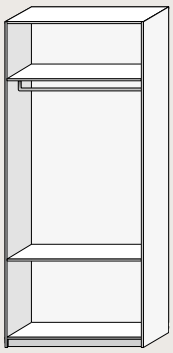

Shelf unit depth: 594 mm,
to fit the carcase depth

Available décor:
362 Como oak reproduction

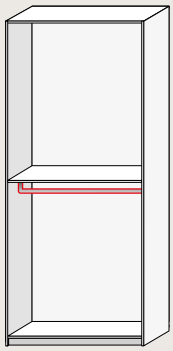

2 SELECTION OF INTERIOR FITTINGS

Each carcase element has two compartment shelves and one wardrobe rail as standard. As an option, further shelves, wardrobe rails, two internal drawers or shelf inserts can be added. In addition, Dream offers lighting options and useful accessories for customising your wardrobe. For details, refer to page 28 in the chapter “Wardrobe supplements”.

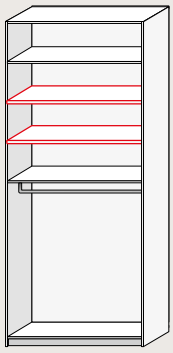

Standard fittings

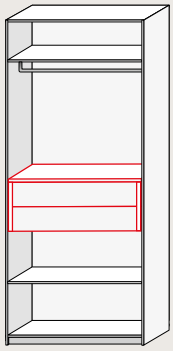

Optional equipment

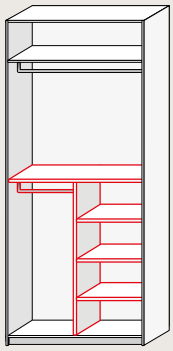

Wardrobe rail

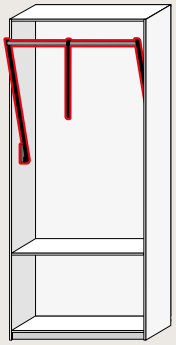

Compartment shelves Set of 2

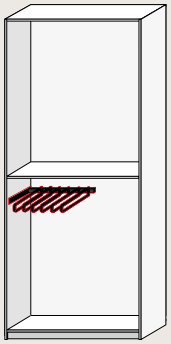

Internal drawers. Set of 2 *

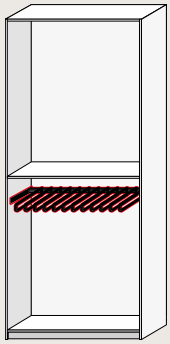

Shelf insert with wardrobe rail and 3 compartment shelves

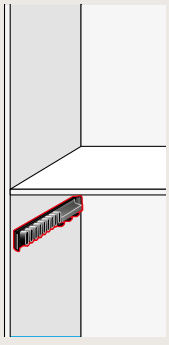

Clothing lift

Pull-out for trousers on one side

Pull-out for trousers on both sides

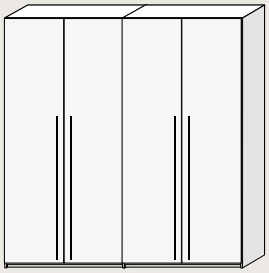

Belt and tie pull-out with tray

*The set always consists of two internal drawers with push-to-open technology for opening.
The set can be positioned on the plinth base or suspended (as shown). In addition, multiple sets can be stacked on top of one another.

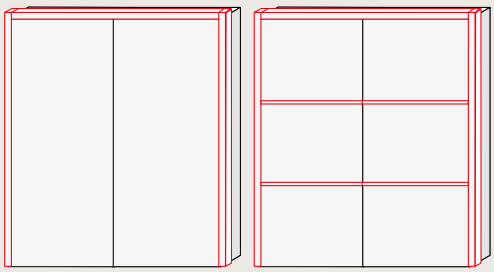

3 SELECTION OF DOORS

The carcase combinations can be designed open, with hinged or sliding doors. Seven handle variants in various lengths or a handleless push-to-open solution are available for the hinged doors. Sliding doors are available either with a passe-partout frame directly on the carcase or planned as room element from wall to wall. Optionally, the sliding doors can be visually separated in the middle with panel-dividing inlays (further ordering information from page 36).

3a Hinged doors

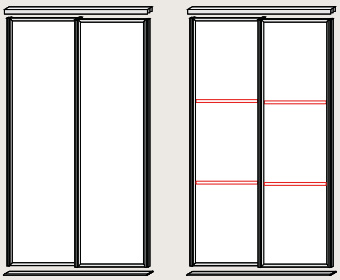

3b Sliding doors on the carcase with passe-partout frame

Optionally with panel-dividing inlays

3c Sliding doors as room element, flush-to-wall-mounted

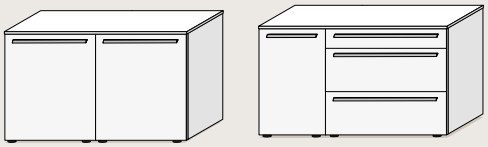

Optionally with panel-dividing inlays

4 ADDITION OF OCCASIONAL FURNITURE AND ADDITIONAL DESIGN ELEMENTS

To match our wardrobes, chests of drawers, bedside tables and additional design elements such as mirrors and wall shelves (see page 48) are available for a coordinated bedroom plan. The chests of drawers come in two heights and five widths. The bedside tables are available in four heights and two widths, either floor-standing or wall-mounted.

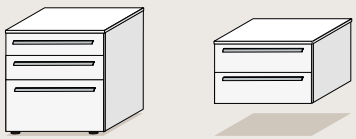

Chests of drawers

Hinged door

Drawers and pull-outs

Bedside tables

Floor-standing

Wall-mounted

WARDROBES
CUSTOMISED DESIGN

Above all, a wardrobe should have the following: sufficient storage space. Individual interior partitions are crucial here, whether in the form of wardrobe rails, shelves or drawers. The door design also plays a part: classic hinged doors or space-saving sliding doors. What is important is that the wardrobe makes the most of the available space. The basis is a flexible carcase system in continuous style, enabling individual fitting options and optimum use of space. Wardrobes can be planned individually and in just a few simple steps with their current design options.

WARDROBES
HINGED DOORS

HINGED DOORS

Our wardrobes can be equipped with hinged doors or sliding doors as required. Hinged doors are characterised by simple shapes and many handle options. You can choose from 7 handle versions in 4 lengths or opt for a handleless push-to-open solution.

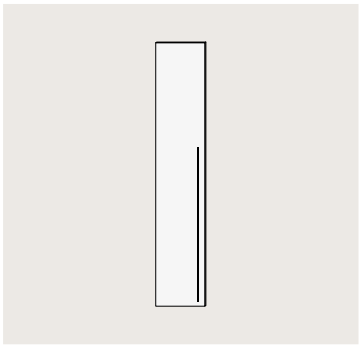

You can choose between doors with a width of 400 mm or 500 mm.

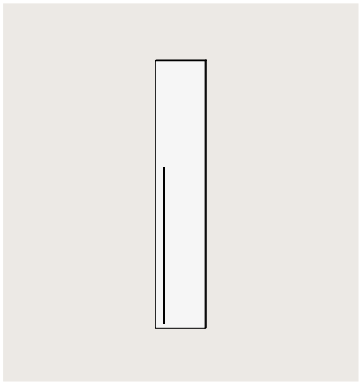

ORDERING INFORMATION HINGED DOORS

- For a carcase width of 800 mm and 1,000 mm, a design with two hinged doors is required.
- No handles are included in the scope of delivery. One handle or one PTO must be ordered and invoiced per hinged door. The desired version can be freely selected. Please indicate the item number of the desired handle length and the handle number. A template is supplied for mounting, which can be used for all handle sizes.
- For the mirrored doors, an angled handle and an adapter for mounting the selected handle variant on the door are automatically included in the delivery for opening.
- If two mirrored doors are planned in front of a carcase, the adapters only allow 1 handle to be installed at the centre in the joint. The second door is opened by reaching behind the door.
- If the corner element is designed with hinged doors, a handle must only be planned on the right-hand door. An additional handle on the left-hand door would lead to collisions when opening the doors. A handleless plan or plan with PTO is not possible for technical reasons.

* When ordering, the respective handle number must be specified.

WARDROBES
SLIDING DOORS

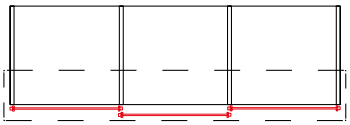

SLIDING DOORS

Another option are sliding doors, these can be planned on the carcase with a passe-partout frame or as room element from wall to wall and floor to ceiling. The top track is either screwed inside the passe-partout frame or in the ceiling. Sliding doors are space-saving, integrate seamlessly and are suitable for both built-in wardrobes as well as walk-in wardrobes. Door widths are between 500 and 1200 mm, heights between 700 and 2600 mm, for continuous doors depending on the décor, up to max. 2000 mm. Split doors are available at a surcharge with panel-dividing rail (GTS120, 1406) or a centre panel with a different décor (MP-GTDW, 1407). The minimum dimension per door is 500 × 700 mm.

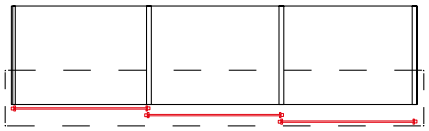

THE TRACK PROFILE

- Track length: max. 5000 mm
- Colours: 014 Stainless steel appearance, 010 Black

double-track (installation depth: 79 mm)

three-track (installation depth: 117 mm)

Scope of delivery per track set:

- Top and bottom tracks coated on both sides
- Top track position holder
- Sealing brush
- Bottom track topper in black or grey

* (The top track is 40 mm high and screwed, the bottom track is 6 mm high and self-adhesive.)

PLANNING AND CALCULATION INFORMATION

CALCULATION

- **Door width** = (total width + overlaps – brushes – wall connections) ÷ doors
- **Door height** = total height – 45 mm
- **Total width** = (doors × door width) – overlaps + brushes + wall connections

CALCULATION INFORMATION

- Take into account that cabinets and built-in units behind the sliding doors are easily accessible.
- The door arrangement must ensure problem-free accessibility of the entire interior system.
- Overlaps increase the door width by + 26 mm.
- Sealing brushes decrease the available opening width by – 3 mm.
- Wall connections decrease the available opening width by – 25 mm.

SLIDING DOOR BRAKES

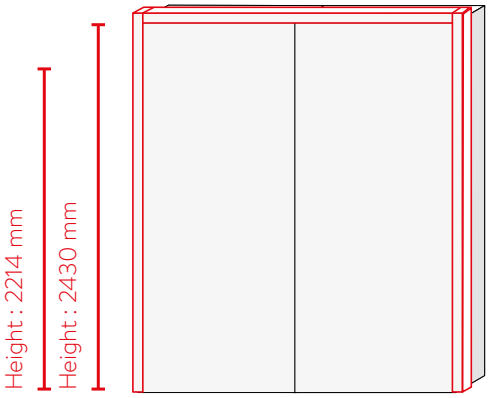

- Doors > 750 mm: min. at least one brake per door recommended, two are appropriate
- Doors < 750 mm: max. 1 brake, tilt protection required
- The number of brakes per door must be specified with the order.
- Without specification of the closing direction: Mounting in accordance with catalogue specification.

DESIGN OF SLIDING DOORS

SLIDING DOORS ON THE CARCASE WITH PASSE-PARTOUT FRAME

Passe-partout frame: 250 mm deep, 25 mm wide

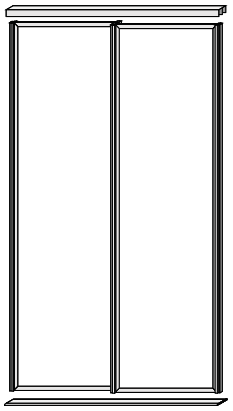

The passe-partout frame is used on the side as an end piece and stop and at the top for attaching the sliding door track if the room situation requires this.

SLIDING DOORS AS ROOM ELEMENT, FLUSH-TO-WALL-MOUNTED

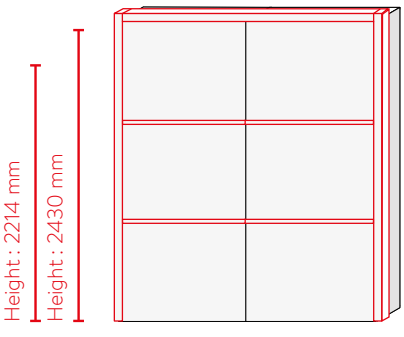

Top track: 40 mm deep

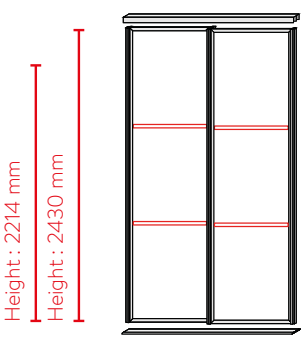

If the cabinet is to run flush from one wall to the opposite wall, sliding door sets are a suitable option. The wardrobe is thus harmoniously integrated into the room architecture and becomes an inherent part of the room.

OPTIONAL PANEL-DIVIDING RAIL

- A surcharge per door is invoiced for sliding doors with a panel-dividing rail. In this case, the doors are visually divided into thirds in a symmetrical manner.
- If continuous and divided doors are combined in a set, please indicate which door is to be divided when placing your order.
- At a surcharge the centre panel can be delivered in a different décor.
- Please specify the different décor for each door.

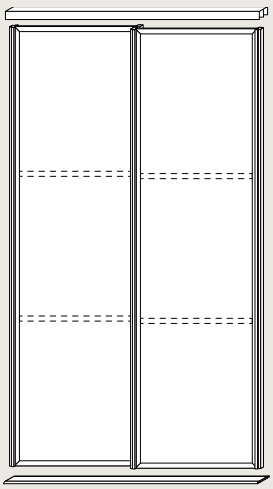

SLIDING DOOR SETS *

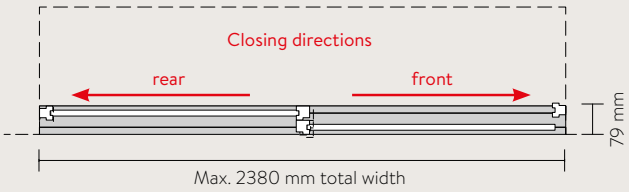

As a rule, all sets consist of the following components:

1. Track set, consisting of bottom and top tracks and potentially top track supports:
   The price is calculated for each 100 mm or part thereof and, if applicable, based on the number of top track supports. Please indicate the profile colour in your order. 014 Stainless steel appearance or 010 Black.
2. Sliding door(s) incl. top track position holder, sealing brush and bottom track stopper:
   The price of a sliding door is calculated from a fixed base price per sliding door GGT (1404) plus a price per m^2 GT120 (1401).
3. For planning with a passe-partout frame on the carcase, the passe-partout frame (PR25) must be ordered in addition.

Surcharges, sliding door brakes, safety brackets, passe-partout frames, cover caps for bottom and top tracks are not included in the set, but must be ordered in addition based on the installation situation.

SET 2: GSSET-002 (1442)

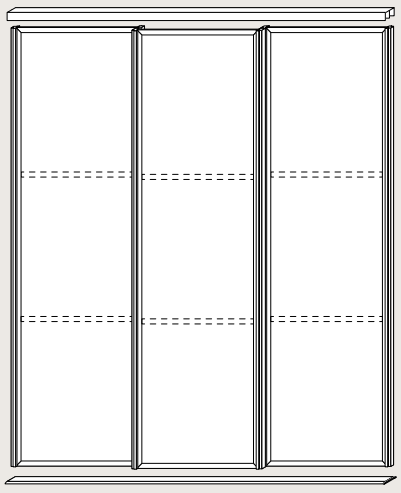

Double-track sliding doors system with 2 doors

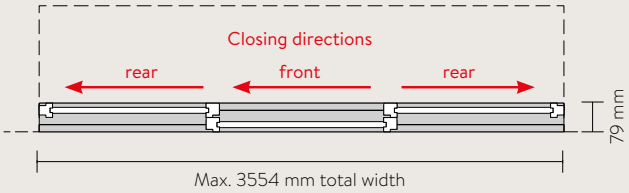

consisting of:

2 x GGT	Base price for sliding doors
2 x GT120	2 sliding doors incl. top track position holder, sealing brush and bottom track stopper
1 x GSSET-2L	double-track track set

We recommend 2 sliding door brakes for doors upwards of 750 mm in width.

SET 3: GSSET-003 (1443)

Double-track sliding doors system with 3 doors

consisting of:

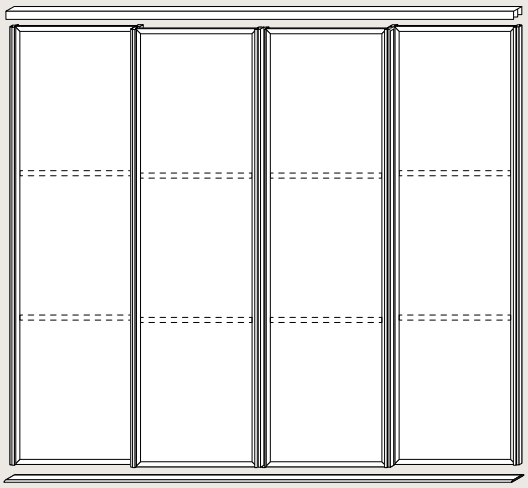

3 x GGT	Base price for sliding doors
3 x GT120	3 sliding doors incl. top track position holder, sealing brush and bottom track stopper
1 x GSSET-2L	double-track track set

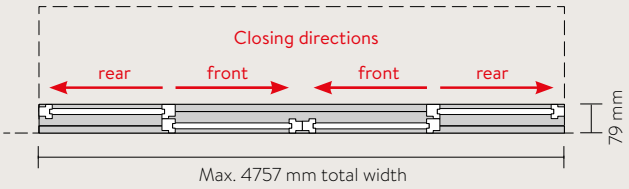

We recommend min. 1 sliding door brake per door for doors upwards of 750 mm in width.

* Please specify the total width of the wardrobe or the width of the open room alcove. The accurate dimensions of the sliding doors are automatically determined in the factory when ordering. Should you want different door widths, please indicate these in the order.

SLIDING DOOR SETS *

SET 5: GSSET-005 (1445)

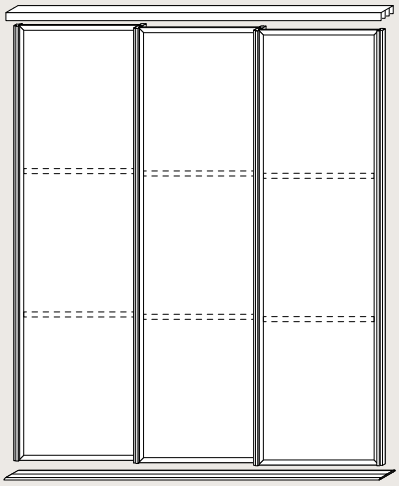

Double-track sliding doors system with 4 doors

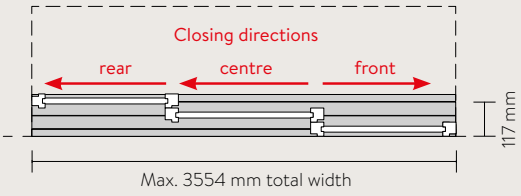

consisting of:

4 x GGT	Base price for sliding doors
4 x GT120	4 sliding doors incl. top track position holder, sealing brush and bottom track stopper
1 x GSSET-2L	double-track track set

We recommend min. 1 sliding door brake per door for doors upwards of 750 mm in width.

SET 6: GSSET-006 (1446)

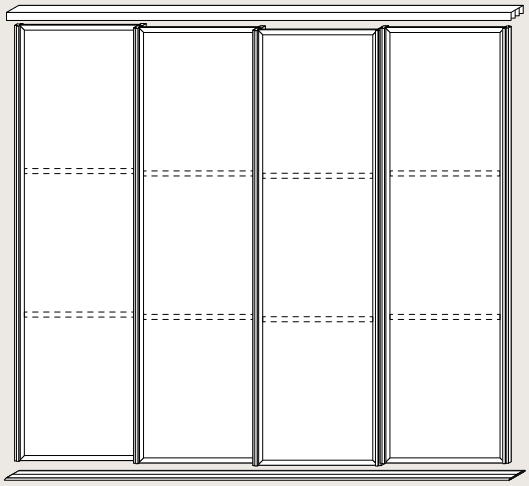

3-track sliding doors system with 3 doors

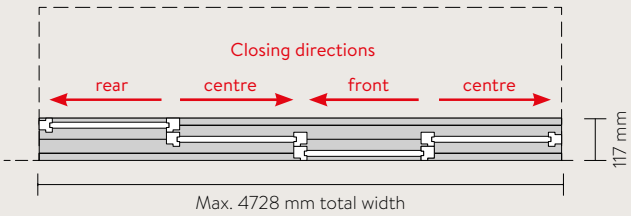

consisting of:

3 x GGT	Base price for sliding doors
3 x GT120	3 sliding doors incl. top track position holder, sealing brush and bottom track stopper
1 x GSSET-3L	triple-track track set

We recommend min. 1 sliding door brake per door for doors upwards of 750 mm in width.

SET 13: GSSET-010 (1548)

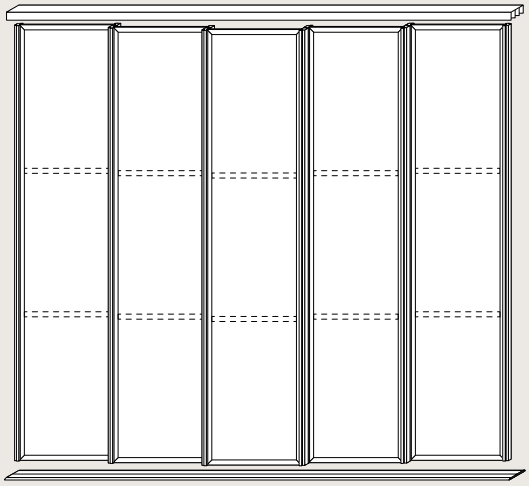

3-track sliding doors system with 4 doors

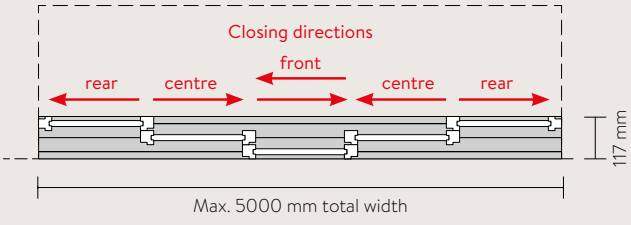

consisting of:

4 x GGT	Base price for sliding doors
4 x GT120	4 sliding doors incl. top track position holder, sealing brush and bottom track stopper
1 x GSSET-3L	triple-track track set

We recommend min. 1 sliding door brake per door for doors upwards of 750 mm in width.

SET 14: GSSET-011 (1549)

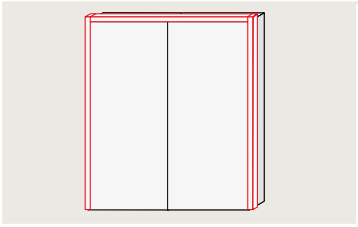

3-track sliding doors system with 5 doors

consisting of:

5 x GGT	Base price for sliding doors
5 x GT120	5 sliding doors incl. top track position holder, sealing brush and bottom track stopper
1 x GSSET-XL	triple-track track set

We recommend min. 1 sliding door brake per door for doors upwards of 750 mm in width.

OCCASIONAL FURNITURE
CUSTOMISED DESIGN

For a complete bedroom design, our occasional furniture complements the full picture perfectly. Our chests of drawers, bedside tables and plug-in wall shelves create additional storage space and turn your bedroom into a well balanced unit. The large selection of décors enables individual coordination with the respective wardrobe configuration. 12 carcase décors, 17 front décors and 13 cover shelves are available. A selection of 7 handle variants complement the visual appearance and add subtle accents. Please indicate the desired options when placing your order.

CONSISTENT LIVING CONCEPT

We develop coordinated furnishing solutions for the entire home. Kitchen, bathroom, living and the bedroom can be designed with the same style and combined harmoniously. In addition to this, we provide solutions for utility rooms, cloakrooms and home office areas, which seamlessly integrate into the overall concept. Our approach: See rooms as a whole and design them so that the interior furnishings result in a coordinated room concept.

KITCHEN

With decades of experience and extensive know-how in the kitchen segment, we offer solutions that meet the highest demands on planning, design and quality. Our kitchens are characterised by versatile and individual design options – from tailored concepts and a large selection of surface and décors up to flexible planning options. A precise finish, durable materials and a high degree of comfort and functionality ensure that our kitchens not only impress visually, but also reliably endure daily use.

BATHROOM

We also apply this coordinated design to the bathroom. High-quality wash basins, matching mirrors and storage space solutions are combined with selected surfaces and décors and finished precisely. This results in a balanced overall picture, combining comfort and functionality.
For well thought out, precise and uncomplicated solutions.

BEDROOM

Our wardrobe systems open up plannable solutions, adapted precisely to the available space and requirement. Whether it is classic hinged doors or modern sliding doors. A coordinated look is created with matching chests of drawers and bedside tables, continuing the style of the entire home. This makes the bedroom part of a harmonised overall concept providing maximum well-being.

LIVING

Living spaces subsist on ambience. Our furniture for this area combines timeless design with homely touches. Whether this is generous tables with a lot of space for social get-togethers, comfortable chairs or open shelves. The result are rooms that equally support every day use and special moments. Suitable cloakroom solutions and home office furniture pick up the style and seamlessly continue this into the defined living spaces.

UTILITY ROOM

Organising made easy: From storage to work areas, the utility room is optimally utilised with clever planning. Supplies, cleaning utensils or washing agents can be stored here in a structured way. Our well thought out organisation aids and combinable modules create additional space, simplify processes and flexibly adapt to your requirements. Functional details and a clear design ensure that every centimetre is optimally used.
